

Clinomic Sets Course for Growth: MedTech Company Strengthens Leadership Team for International Scaling

Aachen, March 26, 2026 – Clinomic, a pioneer in data-driven critical care, has appointed experienced expert Bodo Hubl as its new Chief Commercial Officer (CCO). Working alongside a newly realigned commercial unit, Hubl will drive the expansion of Clinomic's European market leadership in the critical care segment and entry into new markets.

Bodo Hubl brings extensive experience from senior roles in sales, operations, marketing, and partner management. Throughout his career, he has played a pivotal role in the growth and scaling of digital health companies, guiding their transformation from startups to scale-ups. His deep expertise in the hospital sector, strategic networking, and market development - combined with a proven track record of building high-performance teams - makes him the ideal choice for the CCO position at Clinomic.

Hubl joins the leadership team around the two founders, Prof. Dr. med. Lukas Martin (CEO), and Dr. med. Arne Peine (CTO). He will lead a newly realigned commercial unit tasked with implementing the company's strategic international growth targets. This appointment is a key step in Clinomic's execution of the goals defined during its €23 million Series B financing round in 2025.

"In Bodo Hubl, we have gained an experienced, strategic leader who will drive our vision of predictive, connected, and data-driven acute medicine with strong execution skills, positioning Clinomic as a leading driver of innovation," says Prof. Dr. med. Lukas Martin.

About Clinomic

Founded in 2019 as a spin-off from RWTH Aachen University Hospital, Clinomic is a MedTech company redefining critical care through connected intelligence. At the heart of its portfolio is Mona, an intelligent assistance platform. As a modular infrastructure for data-driven medicine, Mona optimizes clinical workflows - from documentation to treatment - using AI-supported, evidence-based insights. The company combines medical and technological expertise to ensure efficient processes and high-quality patient care. Clinomic currently employs more than 75 people across its locations in Aachen, Germany, and Cluj-Napoca, Romania. www.clinomic.ai
